BALLONSTÄNDER
BALLONPORTAL

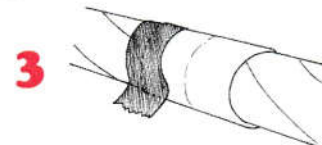

Read the instructions to easily create a beautiful arch of balloons suitable for every event...

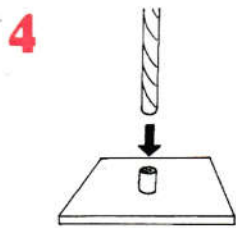

Placed on the floor the 2 bases

Assemble all the pipes and their connectors.

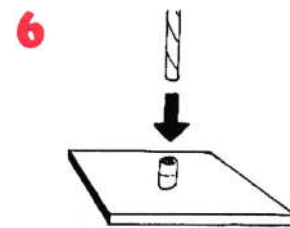

Put scotch tape between the fittings and pipes

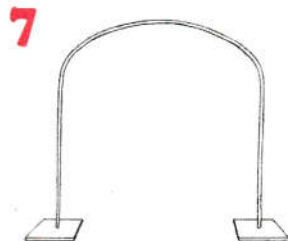

Insert the end of the tube into a base with connector

Flex the tube up to create an arc.

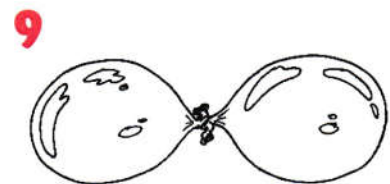

Assemble the other end of the tube to the second base.

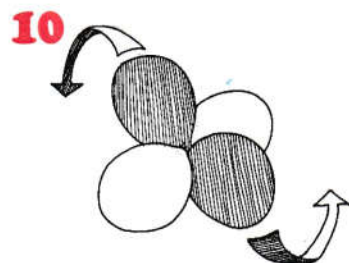

So we will have the backbone of the arc.

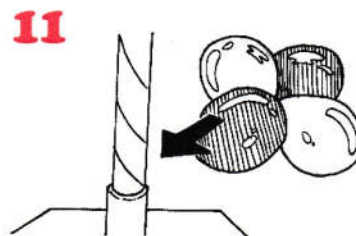

Inflate the balloons all the same size of 10"

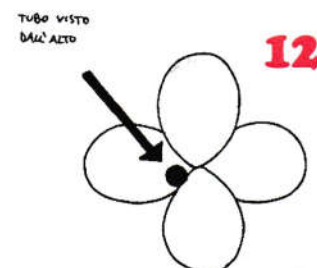

Tie 2 balloons of the same color and then tie 2 other color

Assemble the 2 petals and knot by turning a pair of balloons, repeat the same process to all the other pairs of balloons

Assemble the pairs just linked to the tube

Engage couples to the tube causing the tube remains at the center of the balloons
